Technical data sheet

CTA-F31 Fixing Agent

Characteristics ：

Increase the fastness for all kinds of printing in needle, woven cotton, T/C cloth, cotton, Lycra cotton and modal, high elastic fabric printing.

Environmental protection:

The SGS test results of formaldehyde, APEO, PVC/ phthalates, heavy metals, the four items meet the EU requirements.

Main applications:

As a paste of additives, the main purpose is to improve the fastness of printed and washing resistant.

Packing specification:

25 Kg

Method of use:

1.Normal usage is 1%， for special requirement like Pigment white can be 2%,for rubber printing not more than 0.5%.

2.It should keep 2 hours hanging.after that can send to curing by 120-150℃with 90s.

Fastness additives CTA-O100 is commonly used in printing paste, such as rubber paste, the CTR-H310/ CTR-M360, also known as cross linking agent, the immortal water, curing agent, it increase fastness effect is very obvious.

In verbal or written just the technical advice to show our Companies sincerity, but for our product ,the user companies still have your responsibility for test, to verify whether is suitable for the process and to use; Given the use of the products of our company process conditions are not my company control, and therefore should be fully responsible by the users themselves.
